

Certified Information Technology Administrator

STEP TOWARDS A BRIGHTER FUTURE

Description

The Certified IT Administrator program fulfills the need for trained entry-level network administrators and security professionals. It provides the essential networking and security technical knowledge, as well as essential business and professional skills, such as teamwork and communication, which are needed to succeed in administrative and management IT positions in the information technology industry.

The Certified IT Administrator program prepares individuals to plan, manage, and secure the network infrastructure of an enterprise. The program includes knowledge and skill development in business communications and leadership, as well as the essential technical knowledge. The technology focus of this program is network administration, with an emphasis on Windows environments, hardware tools, networking tools and security of the network infrastructure.
