WESTERN COMMUNITY COLLEGE
TRANSFORMING COMMUNITIES THROUGH **EDUCATION**

———

Program Overview

Network Administrator program fulfills the need for trained entry-level network administrators and security professionals. This program provides the essential networking and security technical knowledge, as well as essential business and professional skills, such as teamwork and communication, which are needed to succeed in administrative and management IT positions in the information technology industry.

Network Administrator program prepares individuals to plan, manage, and secure the network infrastructure of an enterprise. The program includes knowledge and skill development in business communications and leadership, as well as the essential technical knowledge. The technology focus of this program is network administration, with an emphasis on Windows environments, hardware tools, networking tools and security of the network infrastructure.

Career Opportunities

Becoming an Information Technology Network Administrator is as easy as applying online to Western Community College. The program prepares student to write industry certification exams, such as CompTIA A+, Network+, Security+ and CCNA. As a graduate from this program, you will be eligible for a number of jobs like...

- Network Administrator
- Cloud Network Solution
- Cloud Computing Specialist
- System Engineer
- Network Security Analyst
